

Secretariat of Komala Announcement:

Execution of Esmael Mohammadi is another show of hatred of Iranian's Islamic regime toward Kurdish nation.

Yesterday morning September 3rd, the two small daughters of Esmael Mohammadi along with their grandfather were impatiently awaiting a long anticipated visit with their father in front of the Oromiyah prison. Instead, they were given their father's will along with a few personal belongings. They let go the body the day after.

This inhumane action showed, one more time, the true face of Islamic regime and its animosity towards the Kurdish people. If yesterday it was the killing of a Mahabadi youth under the most brutal torture, today its execution of Mr. Mohammadi only a few minutes before his visit with his children, which only shows different tactics that the regime is using to intimidate Kurdish people and repress their just demand for equal rights. These actions only show their intent to repress any dissent.

Execution of Esmael Mohammadi is done in the backdrop of international efforts of several human right organizations and a number of foreign ministries of several European countries as well as personalities to stop his execution. This shows clearly the new terrorizing and intimidating policy of the new government of Ahmadinejad.

Esmael Mohammadi was not the only one whose life has been shortened so inhumanely and no doubt will be the last, but this brutal action sure will fan people's anger and make them more resolute in their demands. It will also strengthen their drive to overthrow this brutal regime and builds up a stronger Kurdish liberation effort.

We thank all political and human rights organizations as well as everyone who put an unrelenting effort to a stay of the execution of Esmael Mohammadi. No doubt this kind of cooperation strengthens the opposition forces against the dictatorship of Iran and paves the way for freedom and democracy.

We relish the memory of Esmael Mohammadi, the dedicated Komala member,
