

The bulletin of Secretariat of Komala

Conspiracy to assassinate civic activities is imminent.

A few days ago a flyer from “Kurdistan Hezbollah Organization” was distributed in the city of Sanandaj in which a number of civic and cultural activists were clearly threatened with attempts at their lives. This terroristic attempt is another brainchild of Secret Services and other oppressive organizations within the regime and their threats need to be taken seriously.

We put the responsibility of possible assassinations and killing of the social, civic, and cultural activists on the regime and its operators of serial killings. We ask all the human rights organizations, and freedom-seeking entities within the country and outside of the country to take these threats seriously and expose the intents of the regime in Kurdistan.
